

January 2015 Edition 5 Number 1

Recycling pallets automatically with Cekamon Saws BV

Used pallets

- Need to be sorted
- While broken pallets need to be repaired
- Or (if not possible) complete dismantled

In this news letter we like to point out pallet sorting

Cekamon Saws BV has tailor made solutions for pallet sorting to:

- Sort 200- 400 pallets per hour
- Sort mono streams (just one type pallet) as well as mixed pallet streams

Your pallet sorting solutions

- [Pallet inspection unit](#)
- [Pallet sorting robot](#)
- [Pallet tipper](#)
- [Pallet stacker](#)

With the automatic systems of Cekamon Saws BV sorting pallets gets cheaper and the physical strain will reduce. Even mixed pallets can be sorted in a justified way. As we all know operators are lifting many pallets and walk many miles per day*. This causes many forms of absence to illness (like back pain). An automatic sorting solution from Cekamon Saws BV not only reduces this absence to illness, but also improves the output of sorting.

* According to rough estimations an operator walks up to 15 miles per day
 ..lifting 12-15 tons per day

Pallet Inspection unit

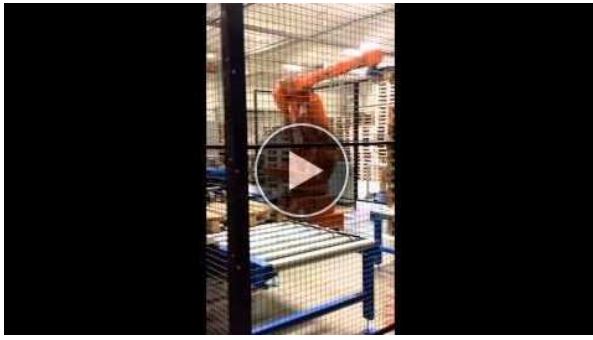

The pallet inspection unit inspects Euro pallets on characteristics given by you. The pallet inspection unit is able to check on colour (light or dark Euro pallets), length, width, and height. And of course the pallets inspection unit also checks if the pallet is broken or not.

Pallet sorting robot

Pallet sorting fast & easy

- A robot that sorts pallets
- Pallets don't need to be stacked by hand anymore
- You only need to choose the quality of the pallet and push on a button. This can also be done by the inspection unit.
- A robot replaces 5-6 stackers
- Interesting prices

Video robot

Video tipper

Pallet tipper

The pallet tipper is a machine that overturns a pallet stack fast and easy. It doesn't matter whether the pallets are nested or not, both are possible. After overturning the pallets you will be able to inspect and sort the pallets. **Overturning pallets without lifting or carrying.** After inspection the pallet rolls into a [pallet stacker](#).

Pallet stacker

When you have big numbers of pallets to stack, speed is everything. The Cekamon pallet stacker stacks your pallets fast. This stacker can also be used as a de-stacker. Of course this pallet stacker can be placed within a sort and/or repair line.

Please mark in your agenda!!

LIGNA 2015

May 11th, 2015 – May 15th, 2015

We would be glad to welcome you at our stand
