CekamonSaws B.V. introduces the MPSL

One of our customers approached us with a list of special requirements for pallet sorting. They knew they'd come to the right place, as we have a wealth of experience in providing both customized and ready-made solutions in this specific area. We put our heads together to come up with the Multi Pallet Sorting Line (MPSL), a unique solution that allows this specific customer to sort an amazing 30 different types of pallets with a single worker

MPSL: Specifications and Benefits

- Can process virtually any type of pallet
- Sorting speed in the mix (based on 30 different pallet types): minimum of 200 pallets an hour Types and quantities of pallets sorted are recorded automatically
- Equipped to sort only one type of pallet if needed (for example, exclusively Euro pallets)
- Sorting speed: for one type of pallet, 400 pallets per hour based on 5 quality levels, e.g. first, second and third class, HT and damaged/rejected pallets
- Can easily be operated by just one worker
- Eliminates the need to haul 10-30kg pallets
- Eliminates unnecessary forklift usage
- Can be combined with a repair line
