Cekamon Saws Newsletter

In this newsletter you can read our latest news. With our Sort- and Repair line you can increase your production and you reduce the physical strain from your employees. Log on to our website www.cekamonsaws.nl and see what we can do for you.

In this newsletter:

- >> Lift standards
- >> Demonstration Line
- >> Wood prices increased again
- >> LIGNA 2011 successful

LIGNA 2011 successful

This year more than 90.000 people visited the LIGNA in Hannover, the world's largest trade fair for the forestry and wood industries. At the trade fair visitors saw the latest developments of 1765 companies.

Due the high demand of used pallets, it appears that sorting and repairing of pallets is more relevant than ever. We showed visitors that the machines of Cekamon Saws makes sorting and repairing of pallets easier, cheaper and reduces the physical strain from your employees. We're looking back on a beautiful week in Hannover.

Click [here](#) to get an impression of the LIGNA.

Wood prices increased again

[Numbers of the CBS](#) (the statistical office in Holland) shows that after a price decrease in 2008, 2009 en 2010, the wood prices in 2011 are rising.

Have you thought about recycling your pallets? With the solutions of Cekamon Saws you can save a lot of money on buying new wood. Moreover you save the environment.

Demonstration line

In our new building we built a demonstration line. This line sorts pallets automatically. After sorting they can be repaired by two employees. In this way 250 – 300 pallets can be sorted.

Do you want to see this demonstration line? Please feel free to contact us. We can show you all the options of our sort- and repairlines.

Lift standards

As employer you are facing regulations regarding lift standards for your employees. With our solutions you can decrease the physical strain like lifting pounds.

Recently, a health and safety expert tested our machines and lines. How many pounds are lifted per day? How many kilometres does the employee walk? What's the effect of the vibrations of the reciprocating saw machine on the forearm of the employee?

Curious about the results of the test and how they differ from your current method? Contact us. We are happy to show you the results of these tests.

Request for information

If you want to start saving thousands of Pounds a year in pallet costs and pallet wood purchases, contact us for a tailor-made offer!
